#### Igenomix's distributor in Malaysia: NANO LIFE QUEST SDN BHD

No. 2A, Jalan Sepadu 25/123A, Axis Industrial Park,  
Seksyen 25, 40400 Shah Alam, Selangor D.E., Malaysia

Tel: +603-55252608

Email: [sales@nanolifequest.com](mailto:sales@nanolifequest.com)

## 1 Good Embryo

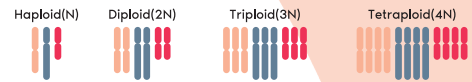

### Smart PGT-A with Ploidy test

A new type of PGT-A reports with:

- **Ploidy test**

A second-line aneuploidy diagnosis for the abnormality that cannot be detected by NGS, such as Triploid 69,XXX.

- **MitoScore®**

A second-line quality ranking for euploid embryos from one patient by mitochondria DNA amount.

- **Partial aneuploid region & size**

Provide detailed information for confirming related genetic diseases. For example, Partial monosomy 6q11.1q27 (108Mb)

- **NGS Profiles for All samples**

## 2 Good Timing

### ERA®

**Endometrial Receptivity Analysis**  
Patented since 2009

- The first "Window of Implantation" genetic test in the world. Especially for patients with recurrent implantation failure patients (RIF) and displaced windows.
- Most extensive database globally with over 200,000 cases
- 238 genes as test targets
- Over 35 scientific publications

## 3 Good Environment

### EMMA

**Endometrial Microbiome Metagenomic Analysis**

### ALICE

**Analysis of Infectious Chronic Endometritis**

- Detect bacteria that cannot be identified by traditional culture methods.
- Recommend the best probiotic and/or antibiotic treatment to balance the endometrial flora and improve the pregnancy prospects.
- Over 8 scientific publications
